

Alkhadi M. Koroma

**AUTONOMOUS VEHICLE OPERATIONS CANDIDATE | LONDON PHV DRIVER | BSc
COMPUTER SCIENCE**

South East London, United Kingdom | +44 7713 150495 | momalkha@aol.com | github.com/Alkhadi

Professional Profile

London-based private hire driver with professional experience since 2016, a BSc in Computer Science and hands-on Flutter/Android application development. Combines London-road knowledge, passenger care, hazard awareness, vehicle checks and calm decision-making with software testing, structured logging and technical problem-solving. Seeking autonomous-vehicle safety, supervised trial, fleet operations, test-driving or data-collection work, with longer-term progression into vehicle data engineering.

CORE STRENGTHS

Safe professional driving
London route knowledge
Hazard observation
Passenger safety and service
Vehicle checks
Incident reporting
Technical troubleshooting
Software testing and debugging

TECHNICAL SKILLS

Flutter and Dart
Android Studio
Git and GitHub
HTML and CSS
WordPress
OCR processing concepts
Structured diagnostic logging
Automated application testing

Relevant Experience

Private Hire Driver / Uber Partner Driver

Self-employed, London | Late 2016-Present

- Provide safe, professional passenger transport across complex London routes and changing traffic conditions.
- Maintain continuous awareness of pedestrians, cyclists, vulnerable road users, road restrictions and unexpected hazards.
- Complete routine vehicle checks and respond appropriately to operational or passenger-safety concerns.
- Use navigation, ride-hailing and real-time journey systems while maintaining attention on safe vehicle operation.
- Make calm, time-sensitive decisions and communicate clearly with passengers from varied backgrounds.

Care Worker / Healthcare Assistant

Royal Hospital for Neuro-disability, Putney | July 2024-Present

- Support people with complex needs while following care plans, safety procedures and professional boundaries.
- Record observations accurately and escalate concerns through the correct channels.
- Work calmly with colleagues in safety-critical situations requiring attention and accountability.

Freelance Web and Application Developer

Independent projects | 2017-Present

- Create and maintain responsive websites using HTML, CSS, WordPress and website-building platforms.
- Develop and debug Flutter/Dart mobile application features using Android Studio and Git.
- Translate user needs into working features, test behaviour and refine solutions iteratively.

Selected Technical Project

London Driver Intelligence - Personal Flutter/Android project, in development

A decision-support prototype for London private hire drivers. The application processes OCR-derived trip-offer information, validates essential fields and applies configurable rules to provide clear outcomes.

- Processes fare, pickup-time, journey-time and location information.
- Applies UK postcode validation, destination confidence checks and congestion warnings.
- Produces take, consider, decline or manual-review outcomes.
- Includes duplicate-event suppression, structured diagnostic logs and automated tests.
- Handles incomplete or unstable OCR inputs conservatively.

Independent personal project. Not affiliated with or approved by Uber or Transport for London.

Education and Development

BSc Computer Science

University of Plymouth, United Kingdom | 2017

Functional Skills Level 2: English and Mathematics

Developing knowledge

Python, SQL, data cleaning, data analysis and machine-learning fundamentals.

Additional Employment

Care and support work, 2016-February 2024; cleaning work, 2010-2016; Catering Assistant at King's College Hospital, 2000-2010; security work across earlier roles. Further details are available where relevant to the position.

Target Opportunities

AV Safety Driver • Trained PHV Driver • Vehicle Operator • Test Driver • Fleet Operations Associate • Data Collection Operator • AV Test Technician
